Those looking to learn more about how they can naturally detoxify their body can find the answers to that and more in a new book titled "Chelation and Other Detox Methods to Save Your Life," by Dr. Edward Kondrot, a world renowned natural health doctor. The book is scheduled for release on March 30, 2015 and will be available online and in stores. The book features interviews Dr. Kondrot conducted with 16 leading natural health experts in the country, offering a wide variety of information on detoxifying the body naturally.

"With the way we live our lives today there are many ways we are surrounded by toxins," explains Dr. Edward Kondrot, founder of the Healing The Eye & Wellness Center. He is also the immediate past president of the Arizona Homeopathic and Integrative Medical Association, and the clinic director of Integrative Medicine of the American Medical College of Homeopathy. "These

toxins can become such a part of our body and lives that they begin to wreak havoc on our health. The good news is there are numerous effective ways to help detoxify the body of them.”

Unfortunately, everyone in the country has been exposed to a wide variety of toxins. They enter our water supply, food, air, and more. They are largely put into the environment by the way we live our lives, including using pesticides, chemical fertilizers, sewage, cadmium, mercury, and other routes. Those toxins and heavy metals can build up in the body, leading to numerous health problems, including Alzheimer’s and Parkinson’s diseases.

The new book, “Chelation and Other Detox Methods to Save Your Life,” provides information on how toxins can be removed from the body in order to restore health, including improving one’s memory and vision. Topics covered in the book include detoxifying naturally, Chelation Therapy, mercury, how our planet is poisoned, holistic dental care, oxidative therapies, and helping the metabolism. The book covers the most effective natural treatments available to us in those areas.

“The information provided in this book is ground breaking, based on the most current research, and not to be missed,” adds Dr. Kondrot. “Whether you need the treatments or you work in a medical practice that provides them, you will come away learning something new and helpful.”

Leading natural health experts interviewed in the “Chelation and Other Detox Methods to Save Your Life” book include Terry Chappell, Bruce Dooley, Dennis Courtney, Dorothy Merritt, Robban Sica, Pieter DeWet, John Trowbridge, Marina Johnson, Robert Rowen, Garry Gordon, Lee Cowden, Martin Dayton, Jeff Kotulski, David Nebbling, W. Carl McMillan, and David Minkoff. There will also be a Chelation Therapy Conference held at the Dolphin Beach Resort in the Tampa area, on April 17-19, 2015.
